

# Brookside Lawn Service

888-701-LAWN (5296)

(330) 721-TURF (8873)

*"Where the grass is always green!"*

## DELUXE 7 STEP PROGRAM

## BASIC 5 STEP PROGRAM

**1 CRABGRASS APPLICATION:** Your lawn technician will apply a nutrient rich, slow release fertilizer that includes a Crabgrass prevention.

**2 LATE SPRING WEED & FEED APPLICATION:** Your applicator will apply a healthy amount of slow release fertilizer to thicken and to create a dark green color. A liquid weed control will also be applied to the entire lawn. Our weed control will remove existing weeds and prevent new weeds from growing.

**3 SUMMER BLEND APPLICATION:** Slow release fertilizer will be applied at the proper rate to prepare your lawn for the summer. We will spot spray with our liquid weed control to remove any weeds in your lawn.

**4 INSECT CHECKUP:** During our visit we will apply insect controls if we find any insects causing damage to your lawn at no additional charge. Slow release fertilizer and liquid weed control will also be applied at this time.

**5 ROOT DEVELOPMENT:** Your applicator will apply a very rich fertilizer which has been formulated to strengthen the root zone and encourage new root growth. At this time we will apply our liquid weed control to the entire lawn.

**6 CORE AERATION:** Delivers fertilizer, water and air directly to the root system. Allows the root system to expand creating a thicker and healthier lawn. Aeration will break down the thatch layers, and loosen compacted soil.

**7 WINTERIZER APPLICATION:** A special balanced fertilizer will be applied. This will create new root growth and encourage food storage for the grass to use during the winter. A Winterizer will promote early spring green up.

*\*Our Deluxe 7 Step Program is a huge benefit by giving you a core aeration priced at the same cost of an application!*

### Additional Services:

**Grub Prevention:** Protects the turf from grubs that can rapidly damage your lawn.

**Tree and Shrub Program:** Deep root feeding. Protection of trees and shrubs from harmful insects and disease.

**Bug Ban:** Prevents ants and other creepy crawlers from entering your home. A perimeter treatment around the foundation on the outside for maximum safety.

**Soil Sample:** Testing your soil will help determine any missing ingredients to a great yard. We will come out and remove soil plugs from your lawn. You will receive a written report from an independent lab with recommendations that will bring your lawn to its fullest potential!

### Program Includes:

- ✓ Treatment of Grubs once discovered (Grub Prevention not included)
- ✓ Free service calls
- ✓ Peace of mind knowing you have a trained and licensed applicator on your lawn
- ✓ Seasonal Newsletter

### Not Included in the Program:

- ✗ Disease Prevention
- ✗ Insect and Grub Prevention
- ✗ Drought damage prevention and proper watering

For your convenience, your service continues from year to year.
