Meehan's Brookside LAWN SERVICE

LAWN DISEASES ARE HERE!

Common summer turf problems

KNOW WHAT TO LOOK FOR ›

6 COMMON LAWN DISEASES

1 FAIRY RING & MUSHROOMS

Circles of mushrooms

2 LAWN RUST

Orange spores on leaves

3 DOLLAR SPOT

Small straw-colored spots

4 LEAF SPOT

Dark lesions on blades

5 RED THREAD

Reddish threadlike growth

6 POWDERY MILDEW

White powdery leaf coating

WHY DISEASE APPEARS

Prolonged rain and humidity can leave turf stressed and vulnerable to fungal diseases. Warm, damp conditions often increase disease pressure.

WHAT YOU CAN DO

Mow at the proper height.
Water deeply when needed.
Avoid evening irrigation.
Keep mower blades sharp.
Follow a lawn-care program.

PREVENTION & RECOVERY

Many lawns recover as conditions improve and new healthy grass grows. Some cases may require professional treatment.
