Meehan's Brookside LAWN SERVICE

MOWING TIPS

A HEALTHIER, GREENER LAWN ALL SEASON LONG!

MOW TALL
WE RECOMMEND 3 INCHES

Set your mower to the highest or second highest setting so the grass is cut at **3 INCHES.**
Mowing taller helps grass develop deeper roots, reduces weeds, and keeps your lawn healthier, greener and more resistant to heat and drought.

MOW SHARP
KEEP YOUR BLADES SHARP

Sharp mower blades cut grass cleanly, while dull blades tear and shred the grass. Torn grass blades can turn brown, invite disease and make your lawn look unhealthy. Check and sharpen your mower blades at least once or twice per season.

- Tears grass
- Leaves frayed tips
- Increases disease risk

- Clean, even cut
- Healthier grass
- Greener appearance

MOW OFTEN
NEVER REMOVE MORE THAN 1/3

Never remove more than one third of the grass blade in a single mowing. If your lawn grows too tall, mow it in stages over a few days. Regular mowing keeps your lawn thicker, healthier and looking its best.

TO MULCH OR NOT TO MULCH?
LEAVE CLIPPINGS FOR A HEALTHIER LAWN

Grass clippings are full of nutrients and can be left on the lawn to naturally return nutrients to the soil. Mulching helps build thicker, greener grass and reduces the need for fertilizer. If you prefer a cleaner look, clippings can be bagged. Just be sure not to let heavy clumps of clippings build up.
