

1

CRABGRASS PREVENTION & SPRING FERTILIZER APPLICATION: A nutrient-rich, slow-release fertilizer designed to promote healthy early-season growth. This treatment prevents Crabgrass, and gives you a thick green lawn in early spring.

2

FEEDING AND QUADRUPLE PREVENTION APPLICATION: A comprehensive mid-spring treatment that keeps your lawn lush and dñe.

- ✓ Slow-release fertilizer for deep green color and dense turf
- ✓ Liquid weed control for broadleaf weed elimination
- ✓ Insect prevention for grubs, billbugs, and armyworms
- ✓ Fungicide application to prevent disease

3

EARLY SUMMER TRIFECTA APPLICATION: Designed to protect your lawn from disease and prepare your lawn for summer stress as well as maintain color and strength.

- ✓ Balanced slow-release fertilizer
- ✓ Spot-spray weed control for persistent weeds
- ✓ Treatment of surface insects
- ✓ Spot treatment of nutsedge and any crabgrass break through
- ✓ Fungicide treatment for lawn disease prevention

4

LATE SUMMER SURVIVAL APPLICATION: A maintenance application to feed your lawn through late summer conditions and keep insects and disease at bay.

- ✓ Slow-release fertilizer and liquid weed control
- ✓ Complimentary insect treatment if damage is found
- ✓ Fungicide treatment for lawn disease prevention
- ✓ Treatment of surface insects
- ✓ Treatment of grubs, as needed

5

ROOT DEVELOPMENT APPLICATION: A very rich fertilizer which has been formulated to strengthen the root zone and encourage new root growth. A liquid weed control will also be applied to the entire lawn.

- ✓ Nutrient-rich fertilizer formulated for deep root growth
- ✓ Full lawn liquid weed control
- ✓ Treatment of grubs, as needed

6

CORE AERATION & OVERSEED: Mechanical aeration and seeding to rejuvenate soil and thicken turf.

- ✓ Aeration to loosen compact soil and increase air, water, and nutrient flow
- ✓ Overseeding to fill bare spots and densify turf
- ✓ Incorporates the latest cultivars of seed into your lawn, improving color and drought resistance

7

WINTERIZER APPLICATION: Final seasonal treatment to prepare your lawn for winter dormancy and spring recovery. One of the most beneficial times to feed and grow roots.

- ✓ Balanced fertilizer builds root reserves for winter survival
- ✓ Special winterizer blend to encourage early spring green-up
