7 & 5 Step Tree and Shrub Program

7 & 5 STEP PROGRAM

1

Spring Feeding and Inspection:

Deep root feeding of trees and shrubs. Provides essential nutrients which encourage big beautiful flowers and healthy stems and leaves for a great start on the season.

2

Plant Health Care Inspection and Treatment:

An integrated pest management approach. A state licensed technician will inspect for diseases and key pests such as Aphids, Lace Bugs, Mites, and Scale. A liquid mixture of Disease and Insect Controls will be applied. This will help to seal and protect your valuable landscape plants from damage.

3

Insect Checkup, Plant Health Care Inspection and Treatment:

An integrated pest management approach. A state licensed technician will again inspect for diseases and target damaging insects. Another liquid mixture of Disease and Insect Controls will be applied. This will help to seal and protect your valuable landscape plants from damage.

4

Insect Checkup, Plant Health Care Inspection and Treatment:

An integrated pest management approach. A state licensed technician will again inspect for diseases and target damaging insects. Another liquid mixture of Disease and Insect Controls will be applied. This will help to seal and protect your valuable landscape plants from damage.

5

Insect Checkup, Plant Health Care Inspection and Treatment:

An integrated pest management approach. A state licensed technician will again inspect for diseases and target damaging insects. Another liquid mixture of Disease and Insect Controls will be applied. This will help to seal and protect your valuable landscape plants from damage.

6

Fall Deep Root Feeding:

Direct injecting of liquid fertilizer promotes root growth, establishes a strong root zone for hardier plants. This application will be done in late fall and will result in healthy plants properly prepared for the winter.

7

Dormant Oil:

Applied during November/December. Targets Scale and over wintering insects on all applicable trees and shrubs. Gives the plants a fresh start by removing all insect infestations.

★ OUR 5 STEP PROGRAM INCLUDES THE 5 STEPS CIRCLED ABOVE ★

What is included in the program?
