Meehan's Brookside LAWN SERVICE

WEED CONTROL

A THICKER, GREENER LAWN STARTS WITH CONTROL!

FREE SERVICE CALLS

If weeds are bothering you, give us a call and we can schedule a **free service call** to treat the weeds.

VISIBLE RESULTS

After treatment, it takes time for the weeds to absorb the treatment and breakdown. You should expect to see the weeds curling and shriveling **within 14 days.**

OUR GOAL

It is our goal to keep your lawn **weed free** with our program. Although it sounds simple, it can be challenging due to different types of weeds and growing conditions.

THINGS TO KNOW ABOUT WEEDS:

Different types of weeds germinate and show up in the lawn at different times throughout the growing season.

Many of the weeds require a different strategy or treatment.

There are some weeds that will require multiple treatments.

YOU'RE PART IN KEEPING YOUR LAWN HEALTHY AND WEED FREE:

1 KEEP YOUR LAWN HIGHER

To reduce weed germination, keep your soil shaded by mowing higher (3" or higher).

2 WATER PROPERLY

During dry times, watering enough to keep the turf healthy and growing (1" to 1.5" of water per week).

3 AERATE YOUR LAWN

Aerating the soil regularly to encourage healthy roots and a thicker lawn.

4 RESEED BARE AREAS

Reseed any thin or bare areas and over seed the lawn. A thick, healthy lawn is the best weed prevention.
